Remarks

Tricky subject , but joyfull one

Great learning experience even though course was bit tough to grasp

its a good course which requires a strong background of probablity . i faced some problem in beginning of the course . so my suggestion to institute is . provides prereqisite before starting of course to all the potential students woh can take this course atleast provide prerequisites to those students for whom this course is departmental core . for freshers provide list of prerequisites along with offer letter because they have enough time after getting offer letter and when class start

The course is a bit difficult without prior base knowledge. Maybe a bit of pre course classes can be taken in start of the classes.

One of the best course offered at IIT Hyderabad, The idea of keeping open group quiz instead of Mid Semester was one best learning experience for me, Looking forward for the course on stochastic process in the next semester !

Interesting and useful course

EXCELLENT

I found the lab course to be highly informative and well-structured.

course was well-organized and topics included were useful and interesting

The course effectively covered fundamental concepts of probability theory, random variables, and stochastic processes. The progression from basic probability to advanced topics was well-structured.

**Very much dedicated Professor. Has the zeal to give as much as possible to students. When I requested him in August to provide video recording of lectures, he immediately understood the importance and started recording the classes and promptly uploading them. Has been carefully designing the questions/ assignments to enhance our thinking levels. Feel myself fortunate to have got the chance to attend his lectures. Student friendly and discourage copying in tests. interested in Culture ಧನ್ಯವಾದಗಳು**

**Thank you for making complex concepts engaging and accessible**

**.**

**puts in all the work for students. very admirable teaching and intuition to explain doubts.**

**The effort Sir put into teaching us new methods was truly remarkable. His teaching approach was exceptionally effective—he introduced concepts in a clear and structured manner, ensuring that even the most challenging ideas became accessible. His dedication to our learning was evident in the way he patiently explained each topic, often going beyond the basics to help us develop a deeper understanding.**

**good teacher**

**very good**

**The instructor delivered the course exceptionally well, and his efforts are truly commendable. I am very pleased with this course, and his teaching has made it significantly more engaging and interesting**

**good**

**good**

**None**

**The instructor has explained this course very well and in a well-organized manner.**

**Karthik sir very honest towards to his work and also praised to TAs under him**

**Thank you so much sir for such a good course. Taking this course was worth it and has been highly beneficial. I highly appreciate your promptness in teaching and your openness to doubts and your interest in teaching and solving doubts. I hope to take the courses offered by you in the future as well.**

**The course was intresting**

**He is Very Good in teaching.**

**good**

**best maths teacher in this world.**

**Outstanding!!! Excellent planning,preparation and delivery of lectures.**

**Good Teaching and Explaining, It would be really good if the class gets over in time as it happens that there are other class just after this class, sometimes even an exam in the next class, and we may miss some important topics here.**

**great professor**

**Karthik sir gave his best in imparting the subject to us, I really appreciate his efforts for making proper HomeWorks, quizzes. He patiently explains every little concept that a student is struggling with. I am very thankful to Karthik sir.**

**In my life it is the first time to experience with this kind of teachers.I feel very happy and fully satisfied with his teaching for this course.If I got very less grade in this subject it is completely my fault.**

**The concept of open quiz is very good.Because of that i realised so many things and I changed my point of studying the subjects.**

**He helped in understanding the concepts very well. Looking forward to take another course from him.**

**Good**

**Thank you much Karthik Sir for all your efforts. It is absolutely pleasure to learn from you. Your zeal and passion for teaching is evident**

**Very Helpful**

**faculty was great, provided us with his recorded lectures. which helped a lot in grasping the contents.**

**Good**

**I am highly satisfied with your teaching of RVSP. Your ability to simplify complex topics and present them in an engaging manner is commendable. The way you encouraged group discussions and interactive sessions made the learning process more dynamic and enjoyable. Your approachable nature and dedication to ensuring every student understood the material were truly inspiring. Thank you for creating such a positive and enriching learning environment!**

**The instructor creates an uplifting and engaging atmosphere in the class, radiating positive energy and maintaining high levels of enthusiasm. Their dynamic teaching style, approachability, and encouragement make learning both enjoyable and inspiring. open exam is remarkable idea ,who make exams are more fun and interactive.**

**good**

**good**

**The instructor explained concepts with remarkable clarity, breaking down complex topics into simple, understandable parts. Their ability to convey ideas effectively ensured that all students could grasp the material with ease.**

**The instructor was highly approachable and always available to address doubts, both during and outside of class. Their patience and thorough explanations made it easy to resolve any confusion.**

**one of the best instructor**

**-**

**I would like to sincerely thank you for your outstanding teaching throughout the Random Variables and Stochastic Processes course. Also he is open for experiement such as open quiz which make the classes even the test more engaging**

**Good instructor**

**Good**

Remarks

I like the way his teaching.

Instructor really wanted us to learn rather than getting marks,so its good,but the exams were tough for me,especially to put concepts into paper

sir you are the one of the best teacher of world keep it up sir . you will become a legandary teacher . i do not have enough word for you. only one suggestion please dont use slides . thanking you best regards

The instructor did complete justice with the course and he taught with his full heart. Even the course is a bit difficult but the teaching methods, tools and the help provided were very good. If possible, I would definitely take another course with this instructor

I don't think the professor should change anything—he is simply the best. His teaching style, clarity, and passion for the subject of Random Variables made learning an enjoyable and deeply rewarding experience. He has a unique ability to inspire curiosity and ensure that every student truly grasps the concepts

Very passionate about teaching.

EXCELLENT

The instructor was knowledgeable, approachable, and effectively communicated the course material

instructor taught the course rigorously and he take lots of effort to teach in understanble way.

The instructor taught the course rigorously. He always makes sure that the topics are clear to all .

**good course**

**very good**

**The course was well-organized, and I gained a substantial amount of knowledge from it. I found that the open quizzes significantly enhanced my problem-solving abilities. As a small suggestion, I recommend forming groups of four members to participate in more open quizzes, as this could further facilitate the learning process**

**good**

**good**

**None**

**This course has enhanced my understanding of probability.**

**It was well organized and it helped me understanding the course outcome**

**The course was really well structured and well taught. The course could have been a bit more application oriented, like it would be helpful if we could solve some more real life based examples but other than that it was one of the best courses I have taken, It was rigorous and gave a different view of probability, the course was really good. Hope to have more courses like this.**

**The course was intresting**

**In starting Im feeling the course is slightly difficult but after few weeks im feeling comfortable. now I like the house and I can see the application of this course in practical life.**

**Well-designed course to improve fundamental thinking of students. Course material was provided in the form of video recordings and assignments with solutions and tutorial sessions were arranged. I strongly recommend juniors to not to miss attending his class. It was joyful to attend the innovative 'open quiz for teams'**

**Good**

**good**

**very good course**

**Excellent planning,preparation and delivery of lectures.**

**Really Good Course, Enjoyed studying it.**

**it was well made course , perfect understanding was given**

**This is the most interesting course, with beautiful concepts and proofs.**

**Good**

**This course was very well organised and very in depth with great understanding.**

**Good**

**Thank you much Karthik Sir for all your efforts. It is absolutely pleasure to learn from you. Your zeal and passion for teaching is evident**

**Interesting**

**The course was little advanced for me, needed to spend a lot of hours in understanding the topics.**

**The in-depth and rigorous approach to understanding RSVP has been an incredible learning experience. It has significantly enhanced my ability to think abstractly, allowing me to tackle complex problems with greater clarity and precision. By focusing on fundamental principles and them systematically, I've developed a deeper appreciation for the power of structured reasoning.**

**Good**

**The course was exceptionally well-structured, providing a perfect blend of theoretical knowledge and practical application. The instructor's teaching style was engaging and effective, fostering a deeper understanding of the subject. Group discussions and interactive sessions added significant value, promoting collaboration and critical thinking among students. While the assignments were beneficial for practice, managing the workload could be challenging at times.**

**well planned course**

**good**

**good**

**The course content was exceptionally well-structured and covered all key concepts comprehensively. The topics were highly relevant and up-to-date, providing a solid foundation for both academic and practical applications.**

**The topics were highly relevant to current industry trends and academic advancements. The course successfully bridged the gap between theoretical knowledge and practical application.**

**The course materials were thorough, well-organized, and provided excellent support for the lec**

**One of the best course**

**-**

**I thoroughly enjoyed the Random Variables and Stochastic Processes course. The subject matter was both intellectually stimulating and highly applicable to real-world scenarios in fields like signal processing, communications, finance, and engineering. The way the course structured the study of random variables, probability distributions, expectation, and variance laid a strong foundation for understanding more advanced topics like stochastic processes, Markov chains, and Brownian motion.**

**Good course**
