Remarks :

The course was wonderful, as usual. It is true that there were some parts that could not be covered, but all in all, I think that this series of courses has prepared me extremely well to tackle more advanced topics (which have already popped up a bit in other courses). I could not have asked for a better foundation in probability than this, and I look forward to any future courses you offer.

Course : AI5090 - Stochastic Processes-Theory and Applications

Remarks :

The course content and delivery were excellent and easy to understand. The only issue we felt was that the class was proceeding, at times, a bit slow-paced with respect to the content. The recap part of the previous class could have been more concise, helping the pacing of the course.

Remarks :

In the second last lecture, Prof. Karthik announced the topics he was going to teach for the last lecture. On hearing last lecture, I became genuinely sad that this course was going to end and that's how you know he is one of the best teachers on this campus. The amount of effort he puts into teaching is so evident because even such dense material feels achievable. Even though RL may not be my future direction for research, I am still planning to sit through it if I get time just because of how good he is at teaching. So grateful to have come across his teaching.

Remarks :

This was the best teaching in my entire college life. The instructor put immense effort to explain all the topics rigorously, removing misconceptions (such as WHAT CLT IS NOT!!!). The instructor took special efforts such as taking half-an-hour extra class everyday, taking extra classes offline on weekends whenever required. I will take any course offered by Dr Karthik with my eyes closed.
